Congress of the United States
House of Representatives
Washington, DC 20515-4708

April 3, 2009

The Honorable David Obey, Chairman
Committee on Appropriations
H-218, The Capitol
Washington, DC 20515

The Honorable Jerry Lewis, Ranking Member
Committee on Appropriations
H-218, The Capitol
Washington, DC 20515

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding in the FY 2010 Commerce, Justice, Science Appropriations bill, Department of Justice, COPS Law Enforcement Technology account for the Pierce County Metropolitan Public Safety Communications Interoperable First Responder Emergency Communication System. The entity to receive funding for this project is the Pierce County Sheriff Department, 930 Tacoma Avenue, Tacoma, Washington 98402. It is my understanding that the funding would be used for the plan, purchase and construction of a county-wide interoperable radio communications system and two 911 dispatch centers (one police and one fire communications facilities), co-locating participating PSAP's into physically separate, fully redundant and survivable Fire and Police communications facilities. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I hereby certify that this request will be made publicly available on my official congressional website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Conference's policy on project requests, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the Congressional Record describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

DAVE REICHERT
Member of Congress

OFFICE OF CONGRESSMAN DAVE REICHERT (WA-08)

PROJECT REQUEST CERTIFICATION

By submitting this request for federal funding, I certify that:

- This project directly benefits the residents of Washington's Eighth Congressional District and merits federal funding assistance.
- None of the funds requested will be used for a new building, program, or project named after a sitting Member of Congress.
- None of the funds requested will be used to secure funds for other entities unless the use of funding is consistent with the specified purpose of the project request.
- For requests where the receiving entity is not a unit of federal, state, or local government, or where the entity receiving the funding will not be providing support to a federal, state, or local government, or will not be providing research, the organization will provide matching funds, including in-kind contributions of 5% or more above the statutory requirement.
- For requests from non-federal, -state, or -local government entities or other public institutions, the organization will submit an End User Letter(s) of Support from a public official representing the direct beneficiaries of the project. This will be inserted into the Congressional Record and disclosed on the Member's Congressional Website.
- Under separate cover, I agree to provide a comprehensive plan outlining the sources of funding for the duration of the project; the percent and source of required matching funds, anticipated sources of the funding for the duration of the project, and a detailed budget for how federal funding assistance will be used to support the project.
- In the interest of transparency, any information submitted with this project request may be disclosed for public review, including but not limited to the Committee or Member's Congressional Website and the Congressional Record.
- Should the project receive federal funding, I agree to disclose whether I hired a lobby firm; if so, the name of the lobby firm; and how much was paid to advocate for this project.

CONGRESSIONAL SITE VISIT CERTIFICATION

In the interests of accountability and transparency, we require that either the Congressman or a member of the Congressman's professional staff visit each project site requesting federal funding. This will enable our office to more thoroughly assess the merits of each project and ensure that limited taxpayer funds are invested wisely.

Upon completion of the congressional site visit, please complete this form and have a representative from the organization (not a representative from a lobbying firm) sign it. The Congressional Staff Member visiting the site will be responsible for collecting the form at the time of the visit.

I hereby certify that on 4/1, 2009 Congressman Dave Reichert/a professional staff member from Congressman Dave Reichert's office visited our organization/project for the purposes of reviewing our request for federal funding.

Dear Senators Murray and Cantwell:

SUBJECT: Support of Pierce County Interoperable Emergency Communication Funding Request

I would like to offer my support of the Pierce County Interoperable Emergency Communications Funding request. This request will benefit first responders across Pierce County and within the Puget Sound Region.

Pierce County first responders from various public safety organizations and jurisdictions must be able to communicate mission critical voice and data information to one and another in real time, wherever and whenever necessary, using their standard radios, mobile computers and other devices. This request will enable my organization's first responders to be able to coordinate responses and assist other jurisdictions in a more effective manner.

Additionally, as technology continues to dramatically improve we must be able to meet the public's demand for services with the Next Generation 911 (NG911) systems in our communications centers. The NG911 systems which will enable us to send and receive pictures, videos, text messages and location information, this capability will enable us to be more effective and provide a much higher level of service to the public. This request will bring us closer to implementing that technology.

I strongly urge you to support our request and improve the capabilities of all Pierce County first responders.

Sincerely,

RONALD W. STEPHENS
Fire Chief

Dear Senator Murray:

I would like to encourage your full support of the Pierce County Interoperable Emergency Communications Funding request. This request will benefit first responders across Pierce County and throughout the Puget Sound Region.

Pierce County first responders from various public safety organizations and jurisdictions must be able to effectively communicate critical voice and data information in real time in order to mitigate emergency situations. We continue to rely heavily on radios and mobile computers to accomplish these needs. Approval of this funding request will enable my organization's first responders to communicate strategic goals, coordinate resources, and assist other jurisdictions in a more effective manner.

Additionally, as technology continues to dramatically improve, we must be able to meet the public demand for services with the Next Generation 911 (NG911) systems. The NG911 systems will allow us to send and receive pictures, videos, text messages and location information. This capability will enable us to be more effective and provide a much higher level of service to the public. This funding will bring us closer to implementing this technology in our communications centers.

This request will enable my organization's first responders to be able to coordinate responses and assist other jurisdictions in a more effective manner.

Additionally, as technology continues to dramatically improve we must be able to meet the public's demand for services with the Next Generation 911 (NG911) systems in our communications centers. The NG911 systems which will enable us to send and receive pictures, videos, text messages and location information, this capability will enable us to be more effective and provide a much higher level of service to the public. This request will bring us closer to implementing that technology.

I strongly urge you to support our request and improve the capabilities of all Pierce County first responders.

Sincerely,

Tom Lique, Fire Chief

City of Tacoma
Police Department

**SUBJECT: SUPPORT OF PIERCE COUNTY INTEROPERABLE EMERGENCY
COMMUNICATION FUNDING REQUEST**

Dear Senators Murray and Cantwell:

I would like to offer my support of the Pierce County Interoperable Emergency Communications Funding request. This request will benefit first responders across Pierce County and within the Puget Sound Region.

Pierce County first responders from various public safety organizations and jurisdictions must be able to communicate mission critical voice and data information to one and another in real time, wherever and whenever necessary, using their standard radios, mobile computers and other devices. This request will enable my organization's first responders to be able to coordinate responses and assist other jurisdictions in a more effective manner.

Additionally, as technology continues to dramatically improve we must be able to meet the public's demand for services with the Next Generation 911 (NG911) systems in our communications centers. The NG911 systems which will enable us to send and receive pictures, videos, text messages and location information, this capability will enable us to be more effective and provide a much higher level of service to the public. This request will bring us closer to implementing that technology.

I strongly urge you to support our request and improve the capabilities of all Pierce County first responders.

Sincerely,

Donald L. Ramsdell
Chief of Police

Washington, D.C. 20510

Senator Maria Cantwell
511 Dirksen Senate Office Building
Washington, DC 20510

SUBJECT: Support of Pierce County Interoperable Emergency Communication
Funding Request

Dear Senators Murray and Cantwell,

The members of the Board and Director of the Law Enforcement Support Agency want to offer our support of the Pierce County Interoperable Emergency Communications Funding request. The Puget Sound Region has been ranked high among areas of the U.S. in the evaluation of overall terrorist threats and likelihood of natural disaster. This request will benefit first responders across Pierce County and within the Puget Sound Region.

Pierce County first responders from various public safety agencies and jurisdictions must be able to communicate mission critical voice and data information to one another in real time, wherever and whenever necessary, using their standard radios, mobile computers and other devices. Funding of this request will enable Pierce County first responders to coordinate responses and assist each other in a more effective manner. Our County's long history of intergovernmental cooperation and regionalism enhances the prospects for successful implementation of this important technology.

Additionally, as technology continues to improve dramatically, we must be able to meet the public demand for emergency services with the Next Generation 911 (NG911) systems in our communications centers. NG911 systems will enable us to send and receive pictures, videos, text messages and location information, and this capability will enable us to be more effective and provide a much higher level of service to the public. Your support for this grant request will bring us closer to implementing that technology here in Washington's second most populous county.

We strongly urge you to support this request and improve the capabilities of all Pierce County first responders.

Sincerely,

Bill Baarsma

Executive Summary/Project Description (MAXIMUM 200 Words):

- Please include a discussion of the project's merits, relevance, eligibility, and why it is a valuable use of taxpayer funds.
- Please limit your description to 200 words.
- You may attach additional information, however, please understand that the description provided below will be used for any and all public disclosure requirements.

Currently, Pierce County has several disparate radio systems which do not allow easy interoperability, or only provide minimal interoperability. There are three main public safety systems in Pierce County; the Tacoma/Puyallup 800 MHz system is nearing the end of it's technological life, the Sheriff's and FireComm's VHF systems do not allow easy interoperability with the Tacoma System and Regional Systems and are mandated by the FCC to change to narrow banding -- which will render the systems less effective. There is a drastic need for improved operable communications and interoperable communications in Pierce County which will take advantage of new technology.

Two critical components of this project involve a county-wide radio system and 911 dispatch centers. Pierce County will plan, purchase and build a county-wide interoperable radio communications system and two 911 dispatch center (one police and one fire communications facilities), co-locating participating PSAP's into physically separate, fully redundant and survivable Fire and Police communications facilities. This project will solve our interoperability issues and establish the capacity to use operating funds, staff and equipment more efficiently.

Region 43, Pierce County law enforcement and fire agencies have committed to developing a regional interoperable communications system and consolidated 911 dispatch centers. This project will fit into the Washington State Emergency Interoperability Communication (SIEC) Plan and within the Puget Sound Emergency Interoperability Communication (PSEIC) Plan.

As an incremental approach we will be required to build additional towers to address two problems: 1) Our current radio system on VHF frequencies -- a FCC mandate requires that we move narrow-banding of our frequencies by 2012. This will create a problem by reducing the distances the radio waves will travel -- thus causing reduced radio coverage. 2) The FCC is pushing public safety to use 700/800 MHz frequencies. These frequencies do not cover as much distance as VHF frequencies -- thus we will need additional radio towers for the current and future system. Current radio coverage studies indicate we will need four (4) more towers and one tower upgraded. We will need an average of \$1,000,000 to build one tower. This request is for increments of \$1,000,000 per tower for up to five (5) towers.

FY2010 APPROPRIATIONS REQUEST FORM

REPRESENTATIVE DAVE REICHERT (WA-08)

(ONE project/program per form)

Justification of funding:

- How does this request fit within the identified bill and account (cite specific precedents and overall purpose of account)?
- How many jobs could this project create and how will it benefit Washington's 8th Congressional District?

Building a regional interoperable communications system with two consolidated PSAP's will dramatically improve the ability of first responders to respond to natural or manmade disasters within our County and improve our day-to-day operational capabilities. This project comes at a critical time due to sun-setting technology and FCC mandates. Additionally, this will enable all first responders to become interoperable. Citizens of Pierce County and the Puget Sound will benefit from first responders rapidly deploying to events and communicating effectively for life safety issues.

Additionally, an estimated 1,080 prevailing wage jobs will be created to construct facilities and communications sites. Further, in-state companies will have the opportunity to participate in supplying building materials, equipment, supplies and services. National corporations will have the opportunity to supply their products and equipment. Local and state governments will benefit from sales tax revenues and permitting fees.

Specific language proposed for Congressman's request to the subcommittee (if any):

Improving communications interoperability for all first responders will benefit the citizens of Pierce County and the Puget Sound Region. The current communications systems in Pierce County are nearing technological obsolescent and require replacement. The 911 answering centers are outdated and require improving survivability and ability to function during potential disasters. Further, Next Generation 911 capabilities need to be implemented to improve public reporting and response capabilities.

Is there any other relevant information regarding this request that you would like to share?

There are several agencies in Pierce County that have united in this effort and fully support construction of this project. We have attached several letters of support regarding this appropriation request.
